**Re.: Convene Emergency Special Session
for Saving our World**

Dear Mr. President of UN General Assembly Tijjani Muhammad-Bande,

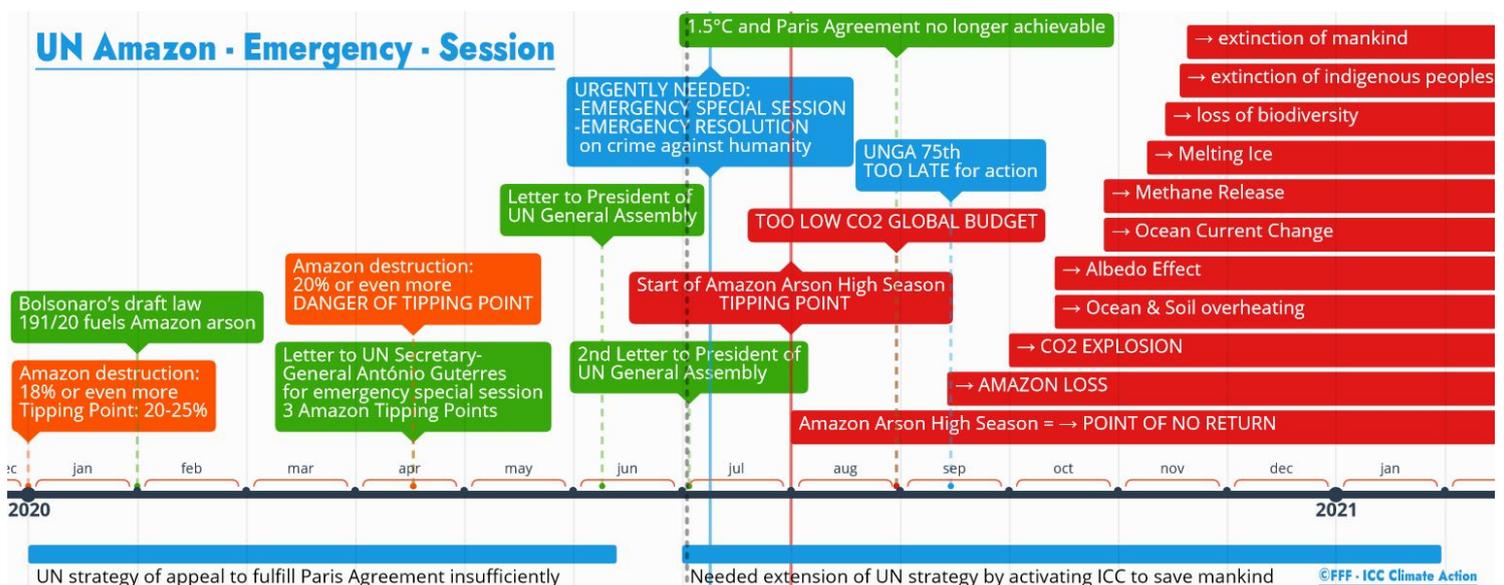

Thank you for your reply letter dated June 22nd.

We received it on the 26th, so it was too late for us to join the celebration.

In your letter, you mention an “omnibus resolution” by the General Assembly in September.

But an omnibus resolution on climate change by the General Assembly in September **will be too late**.

The decisive tipping point of the Amazon Rainforest is at 20-25%. **Today we are already at 20% or even more (!)**. As you can see in the following [graphic](#) mankind is on the brink of extinction:

With Resolution 377 A (V) you must stop this irreversible tipping point from happening by activating an emergency special session to resolve:

[Summary of draft Resolution:](#)

- (a) *The absolute protection of the Amazon rainforest*
- (b) *The prohibition of the adoption of the draft Law 191/20*
- (c) *The prohibition of all fossil subsidies*

and

(d) The criminalization of failure to comply with, or massive violation of, the Paris Agreement as a crime against humanity and genocide

(e) The activation of the International Criminal Court to take immediate action and bring charges against the perpetrators of the crimes in order to protect humanity in a real and highly effective way

For to save the world and to make the Paris Agreement be fulfilled almost immediately the United Nations need to adjust its - so far inefficient - strategy of appeals by enclosing the activation of the ICC by an emergency resolution.

Further solutions which could be included are

- 1.) Trade based on the further destruction of the Amazon will be sanctioned by the UN or be boycotted.
- 2.) Active UN payment for Brazil for the protection of the Amazon rainforest (win-win-situation).

The global future depends on your decision to convene the Emergency Special Session in the coming days to decide on this epochal and, essential for survival, resolution!

Thank you very much.

Yours, sincerely
Elias Pfeffer
